Technology Advisory Services

STAKEHOLDER INTERVIEW GUIDE

Emerging Technology Adoption Assessment

Prepared for

Manila Manufacturing Corporation (MMC)

A medium-sized consumer goods manufacturer

Prepared by: Añano, Mark Dennis J.

Technology Consultant, TechVision Consulting Inc.

Date: September 12, 2026

1. Introduction & Interviewer Instructions

Purpose of this Guide

This interview guide supports TechVision Consulting Inc.'s engagement with Manila Manufacturing Corporation (MMC). MMC has expressed interest in adopting emerging technologies to modernize operations, improve efficiency, and remain competitive, but is uncertain which technologies to prioritize and how to implement them. The purpose of this guide is to gather first-hand information from key MMC stakeholders on the company's current state, technology awareness, readiness, challenges, skills, budget, and implementation capacity. Findings from these interviews will directly inform the Technology Adoption Recommendation Report to be submitted to MMC leadership.

Instructions for the Interviewer

1. Review this guide fully before the interview and become familiar with the emerging technology areas covered (AI, Machine Learning, AR, IoT, Cloud Computing, Big Data, and Quantum Computing).
2. Confirm the interviewee's availability, and schedule at least 45–60 minutes to allow time for probing follow-up questions.
3. Begin by introducing yourself, TechVision Consulting Inc., and the purpose of the engagement. Assure the interviewee that responses will be used solely to inform the technology recommendation report.
4. Complete the Interviewee Information section before starting the substantive questions.
5. Follow the section order, but adapt the flow naturally if the conversation moves ahead of a topic — do not force a rigid sequence if it disrupts rapport.
6. Use the probing follow-up questions provided (Why? How? Can you elaborate? Can you give an example?) whenever an answer is vague, general, or could reveal useful additional detail.
7. Record responses in the Notes/Response space provided under each question. Write legibly or type directly if using a digital copy.
8. Do not lead the interviewee toward a particular technology; the goal is an accurate picture of MMC's actual current state and readiness.
9. Maintain confidentiality of all information shared during the interview.
10. Close the interview using the Closing section, thank the interviewee, and confirm next steps.

2. Interviewee Information

To be completed by the interviewer at the start of the session.

3. Background and Current State

1. **Can you briefly describe your role and how it relates to MMC's day-to-day manufacturing and business operations?**

2. **What technology systems (e.g., ERP, inventory, production, payroll) does MMC currently use to run its operations?**

3. **What are the biggest operational challenges MMC currently faces, and how do you feel current technology helps or falls short in addressing them?**

4. **What business goals is MMC hoping to achieve over the next 1–3 years, and how do you see technology playing a role in reaching them?**

4. Technology Awareness and Readiness

5. **How familiar are you with the term 'emerging technology,' and what does it mean to you in the context of MMC's business?**

6. **Has MMC previously explored or piloted any new or emerging technology? If yes, what was the outcome?**

7. **On a scale of 1–5, how would you rate MMC's overall readiness to adopt new technology, and why?**

8. **What factors, in your view, would make MMC's employees or management resistant to adopting new technology?**

5. Industry and Competitive Analysis

9. **How do you think MMC's use of technology compares to other consumer goods manufacturers in the industry?**

10. **Are there any competitors or industry leaders whose use of technology MMC looks to as a benchmark or model?**

11. **What risks do you think MMC faces if it does not modernize its operations with emerging technology?**

6. Specific Technology Areas

6.1 Artificial Intelligence (AI)

12. Is MMC currently using any form of artificial intelligence (e.g., automated quality checks, chatbots, demand forecasting)? Please describe.
-
13. What manufacturing or business processes at MMC do you think could benefit most from AI-driven automation or decision support?
-
14. What concerns, if any, do you have about introducing AI into MMC's operations (e.g., cost, job impact, reliability)?
-

6.2 Machine Learning (ML)

15. Does MMC currently collect enough historical production, sales, or quality data that could be used to train a machine learning model?
-
16. Would predictive capabilities (e.g., predicting equipment failure, demand spikes, or defect rates) be valuable to MMC's operations? How so?
-

6.3 Augmented Reality (AR)

17. Has MMC ever used or considered AR for tasks such as equipment maintenance guidance, employee training, or warehouse picking?
-
18. Which MMC processes, such as machine maintenance, staff training, or product design, do you think could benefit from AR overlays or visual guidance?
-
19. What barriers (cost, hardware, employee skill) do you foresee in introducing AR tools to the shop floor?
-

6.4 Internet of Things (IoT)

20. Are any of MMC's machines, sensors, or equipment currently connected to a network or monitoring system?
-
21. Would real-time monitoring of equipment performance, inventory levels, or environmental conditions be useful to MMC? Can you give an example?
-
22. What concerns does MMC have regarding data security or connectivity if production equipment were connected to the internet?
-

6.5 Cloud Computing

23. Does MMC currently store data or run any systems on cloud platforms, or is everything managed on local/on-premise servers?
-
24. What advantages or concerns come to mind when you think about migrating MMC's systems and data to the cloud?
-
25. How important is remote access to company systems and data for MMC's managers or staff?
-

6.6 Big Data Analytics

26. What kinds of data does MMC regularly collect (e.g., sales, production, customer, supply chain), and where is it stored?
-
27. Does MMC currently analyze this data to support decision-making? If so, how?
-
28. What business questions do you wish MMC could answer more quickly or accurately through better data analysis?
-

6.7 Quantum Computing

29. How familiar are you with quantum computing, and are you aware of any potential applications for manufacturing or logistics?
-
30. Given that quantum computing is still an early-stage and highly specialized technology, do you see it as a near-term priority for MMC, or more of a long-term consideration? Why?
-

7. Skills and Capacity

31. Does MMC currently have in-house IT staff or technical personnel who could support the adoption of new technologies?
-
32. What skills gaps, if any, exist among current employees that might affect the successful adoption of emerging technology?
-
33. Would MMC be open to training existing staff, hiring new talent, or partnering with outside vendors to build technical capacity? Please explain.
-

8. Budget and Implementation

34. Does MMC have a defined budget or funding process for technology investments? How are such decisions typically approved?
-

35. Would MMC prefer to adopt new technology gradually, through small pilot projects, or through a larger, company-wide rollout? Why?
-

36. What timeline would MMC consider realistic for implementing a new emerging technology initiative, from planning to full use?
-

9. Closing

37. Is there anything else about MMC's operations, challenges, or technology goals that we haven't covered but that you think is important for us to know?
-

Closing Script (read to interviewee):

"Thank you very much for your time and for sharing these insights with us today. Your responses will help TechVision Consulting Inc. develop practical, well-informed recommendations for MMC's technology adoption strategy. We may follow up if we need clarification on any of your answers. Do you have any questions for us before we conclude?"

Interview concluded at: _____ Follow-up needed: ☐ Yes ☐ No
